

Digital Banking Release Updates

Desktop Release

Version: 2024.2.1

Release Date: 6/9/2024

Release Details:

Description	Details:
<p>Authentication Enhancement</p>	<p>Digital Banking is introducing a new bot mitigation tool, Turnstile, to the Authentication/Login screen to provide an always-on technology to address credential stuffing attacks and other automated attacks against the Digital Banking platform. Turnstile displays an additional visible widget on the login page to help identify real users versus bots.</p> <p>Some members may need to click a dynamically generated *Verify you are human* checkbox to complete verification.</p>  <p>The screenshot shows the Unitus login interface. At the top is the Unitus logo. Below it are input fields for 'Username' and 'Password'. There is a 'Remember Me' toggle switch which is currently turned on. Below the password field is a Turnstile widget with a checkbox labeled 'Verify you are human' and the Cloudflare logo. At the bottom of the form is a 'Log in' button, a link for 'Forgot Username or Password?', and a link for 'Register a New Account'.</p>

External Transfer Submitted – Alert Updated	Updated the *External Transfer Submitted* alert to only display the last four digits of the account number. Only showing the last four digits of the account number makes the alerts more secure.
Bill Pay - Multi Pay	Fixed issue - when a member adds more than 1 payee to pay in the multi-pay tab, it does not dropdown a pay from account for any of the other payee payments. Following this release, members can select the pay from account for all payees.

Mobile App Release

Version: 4012.2

Release Date: Available now in App Stores

Release Details:

Description	Details:
Transaction Sync Enhancement	<p>In rare instances, transaction syncs fail unexpectedly upon logging in to the Digital Banking platform. The result is that members may not see all their transactions within the Accounts widget. Before this change, there was no way for the member to know that this occurred.</p> <p>Now, if the sync fails, members are informed that some transactions may be missing and that they should try to log in again after a short time. The notification only appears if the sync fails.</p>
Screen Reader Improvements	When members use a screen reader and enter text into the Search field, the list of accounts updates automatically, and audio feedback is provided to the member.
Transaction Descriptions in Mobile App	Before this change, transaction description summaries were often truncated, so in those instances where it is truncated, members could not see the full description. Members can now always see the full transaction description on the Transaction Details screen within the Accounts widget on a mobile device.
